

The NASSCO Tidepool

Environmental Engineering Mission Statement

General Dynamics NASSCO Environmental Engineering is dedicated to maintaining an Environmental Management System that continually strives to go beyond regulatory compliance.

General Dynamics NASSCO Environmental Engineering is committed to conducting all operations in a manner that safeguards the health and safety of all employees and the public, preserves natural resources, and protects the environment. This commitment to protecting the air, water, and land is carried out through energy conservation initiatives, recycling programs, and on-going process improvements.

NASSCO's 6th Annual Environmental Star Awards

NASSCO ended its Pollution Prevention Week with the Environmental Star Awards on October 11. The awards honored those who best display NASSCO's commitment to the environment. The employees and groups honored were nominated by other NASSCO employees who recognized their outstanding performance and respect for the environment. The awards luncheon began with an introduction from Environmental Engineering Specialist Kacey Christie, who congratulated and handed out certificates to all of the E-Star nominees. Fred Harris then addressed the attendees and reiterated the importance of NASSCO's commitment to the environment. As in years past, the 2007 E-star Awards were a fun, team-building event that recognized the hard work of our dedicated employees.
